Experience

College Music

Freelance Web Developer — *July 2020 - March 2021*

<https://live-collegemusic-co-uk.netlify.app> — Worked on a dynamic, user-accessible, and responsive standalone site for the lo-fi streaming company College Music. I've learned a lot about client-side javascript and APIs with this one. Integrated Spotify API with <https://odesli.co> API to create a song search to song link API custom for the app. Used AlpineJS, Nunjucks, and 11ty to deliver a SPA that intends to be lighter-weight than a standard all javascript SPA.

G-Power

Freelance Web Developer — *March 2020 - March 2021*

<https://getgpower.com> — Originally a WordPress site serving 6kb on the homepage, the rewrite weighs only 308kb, is fully responsive, and the main goal was for it to be accessible for every customer of G-Power. It also uses AlpineJS to allow for a responsive menubar. The site uses minimal JS to improve loading times and accessibility.
